

EXPRESSIONS OF INTEREST Information Technology Services

Feed Central is seeking expressions of interest for a long term partner that can assist us to:

- Improve interactivity between our existing databases / operating systems
- Introduce and integrate a CRM
- Improve reporting
- Integrate apps for external client and internal client usage over the medium term
- Manage, maintain and upgrade our internal systems over the long term
- Proactively plan and code for the future (future proof our system / preempt issues and problems).

We are specifically seeking to work with a company or individual who can gain an intimate understanding of our business and create and deploy highly stable, customer focused solutions via I.T. We are specifically seeking a company that can embrace our business, understand it thoroughly, and create solutions rapidly and future proof our systems and code.

Feed Central has been in business for 15 years, during this time we have developed long term partnerships with only 2 individuals who have built the systems that we have today. We are now looking to transition from the existing service provider, after a satisfactory trial period and to have a stable, yet innovative and dynamic partnership with a new service provider who can rapidly gain a complete understanding of our business and our systems.

For more information about Feed Central please visit our website www.feedcentral.com.au, feel free to log-in and explore. We are also able to introduce you to our existing service provider.

We see integration to a CRM and app development as a vital step in the short-medium term, but our current systems requires the following skills:

Essential:

- Very high competency in MS SQL Server
- Stored procedures
- Creating and modifying complex queries including the use of Common Table Expressions (CTE's)
- CLR objects
- SQL Agent Jobs for backups and indexing
- Sound to High competency in:
- C#
 - a. Debugging Skills
 - b. Console applications
- ASP.NET
 - a. Working knowledge of .net framework for any server side code
 - b. asp.net Forms
 - c. Generic Handlers
 - d. Web configuration with php and wordpress solutions integrated into the environment
- JavaScript
 - a. Working JQuery knowledge.
- CSS
- HTML

- a. Use of application cache for offline access of some pages
- Bootstrap
- Internet Information Explorer (IIS 8.0+)
 - a. Managing the website
 - b. Application permissions
 - c. Integration with php
 - d. URL Rewrite
- MYSQL
- Stored procedures and triggers
- General queries
- CPanel
- Experience in management of CPanel
- Domain Name System (DNS) record management

Highly Preferred:

Ability to acquire a sound knowledge of the following skill sets:

- Microsoft Exchange
- Management of distribution groups
- PHP
- Wordpress - addition, editing of content, backing up, updating plugins.
- Windows Advanced Firewall
- Management of port forwarding rules on routers
