

SAFETY TIPS

FOR
DELIVERING, UNLOADING
& STORING HAY

Well Stacked Truck

Drive safe and have a secure load. Strong, stable and well-made bales, correctly stacked on the trailer and securely strapped.

Load Safety

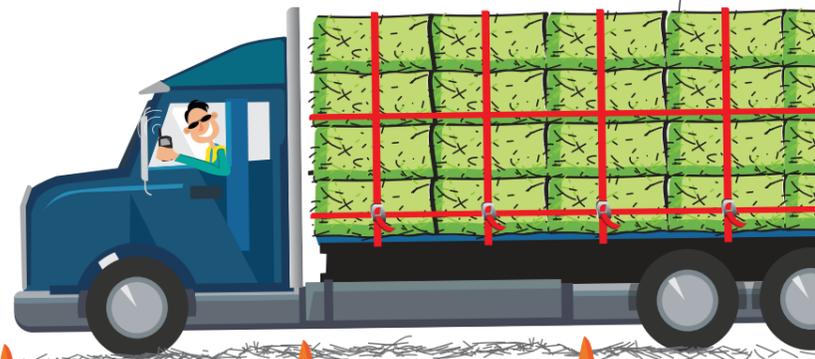

Make a plan. Ensure everyone stays in sight at all times and out of the exclusion zones.

MACHINERY SPONSOR

Good Communication

Good communication between all involved is critical in delivering, unloading and storing hay safely.

Load Checking & Exclusion Zones

Check bale stability before unstrapping. Create an exclusion zone to keep people out of the bale fall zones on both sides of the truck.

Stacking of Hay

Prevent hay stacks from falling and causing serious injury or death. Use the bricked and stepped stacking techniques.
